

QGIS Application - Bug report #2054

OSM plugin: tags/values not deleted on upload

2009-11-06 07:45 AM - Dan Karran

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Martin Dobias	
<b>Category:</b>	Python plugins	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	OS X	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 12114
<b>Description</b>		
<p>When a tag is removed from a node in OSM and then uploaded, the uploader thinks there is a change to be made, and a new version of the OSM node is created, but the tag you deleted in QGIS does not get removed from the OSM node.</p> <p>Also related, if you add a tag through QGIS, then remove it, and upload your changes, the tag still gets added to the OSM node.</p> <p>See, e.g. <a href="http://www.openstreetmap.org/browse/node/283515072">http://www.openstreetmap.org/browse/node/283515072</a> where I added the addr:city tag by accident, removed it in QGIS and added an operator tag (v3 of OSM node). I subsequently tried to remove the operator tag (v4).</p>
