When setting "default output vector layer extension" to GPKG, some tools are still writing shapefiles. An example is "split vector layer".

I think, most of the tools never haven been ported to support multi-layer vector sets.

History
#1 - 2018-11-20 12:00 AM - Tobias Wendorff
  - Description updated

#2 - 2018-11-20 11:47 AM - Giovanni Manghi
  - Category changed from Unknown to Processing/Core

#3 - 2019-01-29 07:19 AM - Alexander Bruy
  - Resolution set to fixed/implemented
  - Status changed from Open to Closed

Closing, as "Vector Split" now produced GeoPackages and default output format settings are not used by Processing and removed.
