# QGIS Application - Bug report #20576 Save SQL as file

2018-11-21 08:36 AM - Tomasz Rychlicki

Status: Open Priority: Normal

Assignee:

Category: DB Manager

Affected QGIS version:3.5(master)Regression?:NoOperating System:Easy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 28396

## Description

While saving SQL query as a file it saves not to '.sql' file but to '.sql,.sql' file. It also adds a empty line in every even line of the created file. I think it would be better if it would not add those empty lines.

- Status changed from Open to Feedback

Does it works as expected on 2.18?

## #2 - 2018-11-21 01:53 PM - Tomasz Rychlicki

It's a new feature. I mean saving SQL statement to a file. It's a new feature, present only in master. I think it was added in this week.
