QGIS Application - Bug report #20580
Legend - Filter legend by map content not working

2018-11-21 01:22 PM - Giles Manners

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Legend			
Affected QGIS version:	3.4.1		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:			**Copied to github as #:**	28400

Description

The Filter legend by map content seems to fail to work occasionally - the count features shows zeros, but the program will not remove these items from the legend. Any ideas how to force this to work, or why it might fail to work?

Hard to say without a project and data to test.

#2 - 2018-11-21 06:28 PM - Giles Manners

I found out why - looking at the Items panel, it showed that there were two maps on the layout and the legend was referencing a spurious empty map that nobody seems to have created (not intentionally anyway), and this seems to have caused a glitch. We right clicked on the extra map, clicked delete, then deleted the legend and added a new legend - and now the filter works.

Thought I would post that in case anyone else has the same issue.
