

## QGIS Application - Feature request #20653

### Check Geometries should remember input layers

2018-11-28 09:50 AM - Lars Ellebjerg

| <b>Description</b>  |                              |   |
| <p>When running Check Geometries most of the settings are remembered from previous runs. The choice of layers however is at every new run set to all vector layers in the project, active or not. It would be nice if only the layer from the previous run was active as default. Geometry checking is often an iterative process where several checks are necessary.</p> |                              |   |
