

QGIS Application - Feature request #2072

Treeview-GUI for SVG symbol choice

2009-11-09 01:46 AM - Andreas Neumann

Status:	Closed	
Priority:	Low	
Assignee:	Tim Sutton	
Category:	GUI	
Pull Request or Patch supplied:	No	Resolution: duplicate
Easy fix?:	No	Copied to github as #: 12132
Description		
<p>The existing icon list choice for SVG symbols is not very well organized and can get slow as there are more and more symbols added.</p> <p>A treeview symbol selection widget would help to solve this issue. It should correspond to the directory structure in the svg symbol directory.</p> <p>It would be great if not all symbols are loaded at once, but maybe only if the tree-leaf is unfolded. That way only the directory structure would be read, but not all individual symbols.</p>
