<div>Description</div> <div>Enable labeling on a layer</div> <div>Use the "change label" tool from the label toolbar, creating a data storage auxiliary DB.</div> <div>In the change label properties dialog, there are some buffer related options (size, color) that you can change.</div> <div>Modify the buffer properties: nothing happens in map canvas.</div> <div>However, looking into the Layer properties dialog --> Attributes form (or Auxiliary storage) tab, you have both auxiliary_storage_labeling_buffercolor and auxiliary_storage_labeling_buffersize that you can unhide and modify. no changes either.</div> <div>Give a look to the layer properties --> Labels --> Buffer tab, the properties are grayed while they should be enabled with yellow widgets for some.</div>
