

## QGIS Application - Bug report #20724

### [Auxiliary storage] Labels Buffer DD options do not have fields set and do not render in map canvas

2018-12-04 06:50 PM - Harrissou Santanna

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Tools	
<b>Affected QGIS version:</b>	3.4.2	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 28544
<b>Description</b>		
<p>Enable labeling on a layer</p> <p>Use the "change label" tool from the label toolbar, creating a data storage auxiliary DB.</p> <p>In the change label properties dialog, there are some buffer related options (size, color) that you can change.</p> <p>Modify the buffer properties: nothing happens in map canvas.</p> <p>However, looking into the Layer properties dialog --&gt; Attributes form (or Auxiliary storage) tab, you have both auxiliary_storage_labeling_buffercolor and auxiliary_storage_labeling_buffersize that you can unhide and modify. no changes either.</p> <p>Give a look to the layer properties --&gt; Labels --&gt; Buffer tab, the properties are grayed while they should be enabled with yellow widgets for some.</p>
