

QGIS Application - Feature request #20726

Remove the "hidden" widget type and set it as a widget property

2018-12-04 06:59 PM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 28546
Priority:	Normal	
Assignee:		
Category:	Edit widget	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>I don't really see the point of having a widget type named "Hidden". It has no particular property by itself and imho can be seen as a property of other widget (eg I set a field as a range widget and then I choose to show or hide it, the same as I check whether it should be editable or read-only).</p> <p>And as mentioned in #20725, it hides the use of some proper widget.</p> <p>I suggest to remove it from the widget type drop-down menu and add it as a checkbox under the General section, next to "Editable" and "Label on top" options.</p>
