**Description**

When using Zoom to Layer on a filtered WFS QGIS zooms to the entire layer, not to the ones in the map.

In my case I have filtered 'fkg:t_5710_born_skole_dis' url='https://fkg.mapcentia.com/wfs/kom167@fkg/fkg/25832' version='auto' table='' sql=SELECT * FROM t_5710_born_skole_dis where kommunekode = 167 by the municipality code = 167, but when using Zoom to Layer all of Denmark is displayed.

[WFS provider] Correctly compute layer extent when zooming out layer (fixes #20742)

Revision 8834ec78 - 2019-02-07 05:34 PM - Even Rouault

[WFS provider] Correctly compute layer extent when zooming out layer (fixes #20742)

**History**

#1 - 2018-12-07 02:25 PM - Giovanni Manghi
- Status changed from Open to Feedback

Does it work as expected on 2.18?

#2 - 2018-12-07 02:55 PM - Lars Ellebjerg

Yes, 2.18 zooms to the elements which are included in the map.

#3 - 2018-12-07 02:58 PM - Giovanni Manghi
- Regression? changed from No to Yes
- Priority changed from Normal to High
- Status changed from Feedback to Open
#4 - 2019-01-28 10:53 AM - Giovanni Manghi
- Related to Bug report #21112: "Zoom to layer" doesn't work as expected on WFS dataprovider when you have a provide feature filter applied to the datasource added

#5 - 2019-02-06 10:31 PM - Even Rouault
