

QGIS Application - Bug report #20751

QGIS 3.4.2 not capable of adding decimal coordinates when editing vertices (pl\_PL locale)

2018-12-07 01:12 PM - Jakub Sprycha

Status:	Open	
Priority:	High	
Assignee:		
Category:	Editing	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28571
Description		
<p>In version 3.4+ QGIS is not capable of editing geometry vertex coordinates with decimal values - it is only possible to enter values that are integers. Using comma (,) in value of coordinate and entering it within Vertex Editor causes to wipe the coordinate to value of 0,0000. It is not possible to use dot (.) - it doesn't show up in coordinate field. I tested it on Virtual layer and (mainly) PostGIS layers.</p> <p>Changing separators in Windows Region Settings doesn't help however I have no problem entering decimal values in QGIS 2.18.</p> <p>I am using QGIS 3.4.2 on Windows 7 with Polish localization.</p>

related/duplicate to #17243 ?

#2 - 2018-12-07 02:36 PM - Jakub Sprycha

Not really a duplicate.

Updating vertex coords to decimal values works well with eg. American English language (decimal separator is dot), but it's broken with Polish localization (where it should be comma). The problem is more like this one: #20255.

that one should be fixed, so how this differs?

#4 - 2018-12-07 03:20 PM - Jakub Sprycha

20255 is about French laungage (fr\_FR locale).

My report is about Polish laungage (pl\_PL locale).

Also it is not the same problem, I said it is similar because it is all about varying separators among laungages - this is not the same type of problem.
