QGIS Application - Bug report #20764 Duplicate QGIS entry in Ubuntu launcher

Build/Install

2018-12-10 05:19 PM - Jorge Rocha

Status:ClosedPriority:NormalAssignee:Jorge Rocha

Affected QGIS version:3.5(master)

Operating System: Ubuntu 18.04

Regression?: No
Easy fix?: Yes

Pull Request or Patch s'applied: Resolution: fixed/implemented

Crashes QGIS or corrupts data: Copied to github as #: 28584

Description

Category:

If the user decides to add QGIS to the launcher favourites, when the user starts the application, two different icons will be at the launcher bar (see attached file).

To fix this double entrance in the launch bar, we need to add StartupWMClass=QGIS3 to the desktop file, so it knows that the applications are the same.

The desired behaviour is a launch bar with just one icon.

I'm submitting a PR to fix this small issue.
