QGIS Application - Bug report #20773
QGIS freezes on loading message

2018-12-11 02:04 PM - Harrissou Santanna

Status:	Open		
Priority:	High		
Assignee:			
Category:	Map Canvas		
Affected QGIS version:	3.4.2	**Regression?:**	Yes
Operating System:	Windows 10	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	28593

Description

Now that the "identify features" freeze has gone away, it's the "loading file" report message that decides to block the project closure. Unable to close properly the project file or cancel the rendering. However afaict the tools seem to work, map canvas is responsive. Issue occurs only when you want to close QGIS.

History

#1 - 2018-12-11 02:36 PM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes

#2 - 2018-12-11 02:53 PM - Harrissou Santanna

@Giovanni, actually, at least from what I've experienced, it does not crash. Nothing prevents you to pursue your work nor save your changes. It's when closing project time comes that you are unable to close it cleanly.

Hi there, I think this is enough to flag it as "crashes".
