QGIS Application - Bug report #20776
Symmetric classification collapsible group in symbology --> graduated renderer behaves weirdly

2018-12-11 04:22 PM - Harrissou Santanna

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	GUI		
Affected QGIS version:	3.5(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	Yes	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	28596

Description

Vector layer properties --> graduated symbology

At the bottom of the dialog, check uncheck the symmetric classification group box combined with the Mode option and you get sometimes a group with both text edit and combobox visible while they are mutually exclusive.

https://github.com/qgis/QGIS/pull/8290 should fix (though untested)
