

QGIS Application - Bug report #20791

On the fly geometry validation doesn't work and causes QGIS to not respond

2018-12-12 04:42 PM - Antonio Viscomi

Status:	Open	
Priority:	High	
Assignee:		
Category:	Geometry	
Affected QGIS version:	3.5(master)	Regression?: No
Operating System:	windows 7 x64	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 28611
Description		
I attached 2screencasts here, data and project are attached to #20789

- Status changed from Closed to Reopened

Hi Jurgen,  
Sorry but this issue appear on "on the fly" validator, not on "check geometries"...  
and it still present on 1ff3ddc61c (today Master)

then I think it is not a duplicate solution

Regards

Hi all,

this issue still affects 3.4.3 <https://github.com/qgis/QGIS/commit/a1ea80047a> and Master <https://github.com/qgis/QGIS/commit/48db864836> (that are Yesterday releases)

and It is related to "Geometry Validation" (real time validator in editing session) not on "Check Geometries" tool

Greetings

Moreover while validation geometry try to do something and QGIS do not respond, CPU usage by QGIS is 0% and RAM usage is static to 360968KB, also on today (<https://github.com/qgis/QGIS/commit/dada301b0b>) release of Master...

#### #7 - 2019-01-09 10:54 AM - Giovanni Manghi

- Subject changed from Geometries validation doon't works in QGIS Master an 3.2.4, and causes QGIS do not respond to On the fly geometry validation doesn'tt works and causes QGIS to not respond
- Status changed from Reopened to Open
- Crashes QGIS or corrupts data changed from No to Yes
- Resolution deleted (duplicate)

#### #8 - 2019-01-09 01:15 PM - Jürgen Fischer

- Subject changed from On the fly geometry validation doesn'tt works and causes QGIS to not respond to On the fly geometry validation doesn't work and causes QGIS to not respond
