| Crashes QGIS or corrupts data: | Yes | Copied to github as #: 28612 |
| Description | | |
| Good afternoon | | |
| I am doing a project for one of my class and for some reason the "edit line" (I have the French version so I don't know the actual name) doesn't work. I am in edit mode and when I click the button it starts charging then the project doesn't answer and the only thing I can do is to close it. | | |
| I don't really know what to do. | | |
