<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 28617

### Description

In QGIS 3.2.2, when I have a shapefile and export it to CSV format using Geometry = AS\_WKT, several lines get errors on export and don't show full content.

If I repeat the process in QGIS 2.18.26, it is fine, so this is a bug in QGIS 3.2.2 version.

Hi Valter,

Thanks for the issue, but can you please provide a small sample of the csv, so devs can test debug it?

Without that it is hard to duplicate.
