

QGIS Application - Bug report #20799

Distance matrix output is false

2018-12-13 03:25 PM - Romain Blanc

Status: Closed	
Priority: Normal	
Assignee:	
Category: Processing/QGIS	
Affected QGIS version: 3.4.2	Regression?: No
Operating System: Windows 10 x64	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 28619
Description	
<p>Take two points layers (example attached) and create a distance matrix in QGIS 2.18.26 and 3.4.2.</p> <p>Results are different, and both are false. With points in example, max distance should be approximately 8 meters (max result of 2.18 -> 2820557.60885 ; 3.4 -> 2803875.70748).</p> <p>The layers and the project are in EPSG 2056 (unit = meter). Meters are defined as default unit in QGIS preferences.</p>

[processing] Throw error when attempting to use Distance Matrix with multipoint datasets

There's no single approach to use for multi-point inputs, so instead of overloading this algorithm with extra options to control how these are handled, we raise a helpful error and push the responsibility back to the user to get the data into the right format before running the tool.

Fixes #20799

History

#1 - 2018-12-13 05:40 PM - Romain Blanc

Same data with ArcGIS Point Distance analysis return correct values.

#2 - 2018-12-15 01:36 AM - Nyal Dawson

- % Done changed from 0 to 100
- Status changed from Open to Closed

Applied in changeset commit:qgis|5c2f68e769509a7aac89898990de0ffdeff0d6e0.

#3 - 2018-12-17 02:22 PM - Giovanni Manghi

- Resolution set to fixed/implemented
