

QGIS Application - Bug report #20846

Shape

2018-12-19 12:08 PM - Sascha von Arx

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Geometry	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 28665
Description		
Some Areas from the Shapefiles "Zusatzobjekte_Freie_Zone_1_Fläche" (Attachement) weren't recognized from QGIS. The not recognized Areas apparently differs from Export to Export?! The Test with FME Import(shape2alt) shows the same Dataset which all areas are visible.

can you be more specific? maybe with a screenshot comparison of areas visible in one software and that are not visible in qgis?

#3 - 2019-01-24 09:13 AM - Sascha von Arx

- File Wasser_Fremdleitung_B_Position.shp added
- File Wasser_Fremdleitung_B_Position.dbf added
- File Wasser_Fremdleitung_B_Position.shx added
- File Version.png added
- File Wasser_Fremdleitungen_B-Position.png added
- File Extensions.png added

On QGIS 3.0.3-Girona it Work's to see all Lines but on QGIS Version 3.4.2-Madeira some Lines are missing from file Wasser_Fremdleitung_B-Position.
Look on the Pictures, "Extensions" for the installed extensions, "Version" for the installed Version and the tested file is Wasser_Fremdleitung_B-Position.

Thanks for a solution for the new Versions. ;-)
