

QGIS Application - Bug report #20864

Rotated layout Items issue

2018-12-21 11:32 AM - Raymond Nijssen

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.4.2	Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 28683
Description		
<p>I'm experiencing some strange behavior while working with rotated labels in a layout.</p> <p>I add a label item on my layout like this:</p> <p>x: 100 y: 100 width: 30 height: 12 refPoint: center-left</p> <p>When I rotate it 270 degrees, it rotates around the center, ending up at x: 115, y: 115. I would expect it to rotate around the center-left reference point.</p> <p>Now I want to display a longer text string, so I extent the label box length a bit (in this rotated state, I drag the top of my label a bit upwards). After releasing my mouse the entire label moves further left and downwards on my layout.</p> <p>Exact same behaviour for picture items, so I guess it is a general QgsLayoutItem thing.</p> <p>Not sure how this is meant to be, but this feels not very logical to me.</p> <p>This could be related to #19987</p>
