<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 12156

#### Description

We have noticed that under windows (xp, vista, seven) and linux (ubuntu 9.10) the tool randomly freezes/crashes qgis (trunk, rev. 12096).

We are developing a project with simple polygon layers in a projected CRS (20790 and 20791), project crs 20790, ofr on, a raster loaded (in the 20790 crs).

Hope this can help tracking down the problem.

#### History

#1 - 2009-11-24 08:55 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

A week later I cannot replicate the problem on the same platforms, in the same conditions and with the same data. Closing.
