QGIS Application - Bug report #20966
algorithm create grid: reference point problem for calculating Y coordinates
2019-01-10 11:37 AM - Alain FERRATON

Status: Closed
Priority: Normal
Assignee: 
Category: Processing/QGIS
Affected QGIS version: 3.4.3
Operating System: 
Pull Request or Patch supplied: 
Crashes QGIS or corrupts data: 

Regression?: No
Easy fix?: No
Resolution: 
Copied to github as #: 28785

Description
The reference point for calculating the other points seems to be the top left point of the grid. It is expected that the bottom left point will be the reference point.

This is a problem if the maximum Y coordinate is not of the form Ymin + n*deltaY with n integer.

The MMQGIS create grid function gives the expected results, even in this case.

see attached illustration

- % Done changed from 0 to 100
- Status changed from Open to Closed
This doesn't seem to be a bug. The code clearly uses that reference point, and the corresponding tests do so. I have updated the documentation to make it clear that the top left point is the reference point for this algorithm.
