QGIS Application - Bug report #2098
OSM plugin: data not displayed if a .osm.db file already exists

2009-11-15 09:06 AM - Dan Karran

Status:	Closed		
Priority:	Low		
Assignee:	Martin Dobias		
Category:	Python plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	12158

Description

If you use the 'Load OSM from file' function to add an OSM file to your project, it works first time, but if you try then to add that same file to another new project, the layers show up in the list but no data gets displayed. It only seems to work if you delete the associated .osm.db file and try again.

History

#1 - 2009-12-19 07:24 AM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

Should be fixed in commit:f66a4264 (SVN r12519).

Probably was affecting everyone being on western or southern hemisphere...
