

QGIS Application - Feature request #20995
Control 'Symbol Levels' at the 'Group' level

2019-01-14 03:44 PM - Charley Glynn

Status:	Open	Resolution: Copied to github as #: 28814
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description This is one feature that works well in ArcMap - the ability to control symbol levels at the group level. As an example, this enables me to group various road layers and control their draw order holistically, rather than individually. Please see the attached image as an example of this functionality in ArcMap 10.6.1. Cheers Charley
