

QGIS Plugin Site - Bug report #21

Synchronizing the list of plugins from django to redmine

2011-03-04 11:59 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:		
Pull Request or Patch supplied:	Supplied:	
Description		
On upload of a new plugin to the django repo, a new redmine project should be added, inheriting the owner, name etc.		

History

An easy solution would be providing a link to the project creation form:

[https://issues.qgis.org/projects/new?project\[name\]=DISPLAYNAME&project\[identifier\]=SHORTNAME&project\[parent_id\]=1&project\[description\]=PROJECT_DESCRIPTION](https://issues.qgis.org/projects/new?project[name]=DISPLAYNAME&project[identifier]=SHORTNAME&project[parent_id]=1&project[description]=PROJECT_DESCRIPTION)

#2 - 2011-04-19 01:04 AM - Martin Dobias

I do not think this should be done automatically. A solution suggested by Pirmin makes sense. I believe that not everyone wants to use the hosting on qgis hub.

#3 - 2011-11-12 08:44 AM - Pirmin Kalberer

- Pull Request or Patch supplied set to No

- Assignee set to Alessandro Pasotti

Or use the REST API:

http://www.redmine.org/projects/redmine/wiki/Rest_api

#4 - 2016-01-15 08:27 AM - Paolo Cavallini

Not so interesting anymore, given that most plugins are on GitHub now. Feel free to close it.

#5 - 2016-01-22 12:19 AM - Paolo Cavallini

- Status changed from Open to Closed
