Pull Request or Patch Supplied:	Resolution: invalid
Easy fix?: No	Copied to github as #: 28824
Description	
<p>Hi</p> <p>I am using QGIS version 2.18.20 & i want to insert mile stone location along road center line with given interval (Length every 500 Mtr)& known offset value. Inputs are Road center line (Shape File) & mile stone detail in excel format (excel format contain road name, Cumulative length , offset detail, alignment(Left/Right)there is no location detail (X,Y coordinate)in excel copy. is there any plugin or function in QGIS to create mile stone points referencing line object by using excel data.</p> <p>If any one have any solution please suggest</p> <p>Thanx Krishna Paul</p>
