

QGIS Application - Bug report #21026

QGIS crashes when plugging in a usb or external hard drive before and a while after opening QGIS application

2019-01-18 08:04 AM - Carla-Louise Ramjukadh

Status: Closed	
Priority: Normal	
Assignee: Jürgen Fischer	
Category: Windows Package	
Affected QGIS version: 3.4.1	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: Yes	Copied to github as #: 28845
Description	
<p>I am running QGIS 3.4.1 on Windows 10. QGIS crashes when plugging in a usb or external hard drive before and a while after opening QGIS.</p> <p>I found when using QGIS 3.4.1 and it is open before plugging in a usb or external hard drive that it crashes. I tested it by first plugging in a usb or external hard drive as well, then adding data from the usb and or working on QGIS 3.4.1 after a while it crashed as well. I don't seem to have the same issue when a usb or external hard drive is not plugged in.</p>
