

QGIS Application - Bug report #21033

Wrong label placement when rotating projected canvas

2019-01-19 01:47 PM - Klas Karlsson

Status: Closed	
Priority: Normal	
Assignee:	
Category: Map Canvas	
Affected QGIS version: 3.4.3	Regression?: No
Operating System: Linux Ubuntu 18.04	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 28852

Description

When I rotate the canvas window any labels in the map will not follow.
It's not stationary! It seems more like the scaling is really off, as well as the general placement.

A link to a video showing the issue:

https://youtu.be/pyb_XzCjACo

Note that it seems to work ok in this case if I keep the data un-projected in wgs-84.

Problem occurs also when using the coordinate field "world" vector layer, so no external data needed to replicate.
