

QGIS Application - Bug report #21041

More clarity on layers versus styles

2019-01-20 12:49 PM - Jonathan Moules

Status: Open	
Priority: Normal	
Assignee:	
Category: Web Services clients/WMS	
Affected QGIS version: 3.4.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 28860
Description	
<p>This WMS: http://ogc.geo-ide.developpement-durable.gouv.fr/wxs?map=%2Fopt%2Fdata%2Fcarto%2Fgeoide-catalogue%2F1.4%2Forg_38102%2F3f11f0-91c9-479a-b748-ed1098603e91.internet.map&#38;version=1.3.0</p> <p>If you go all the way down to opening ID 7/8, you see layers named/titled: "default" and "inspire_common:dEFAULT" - but neither of these is layers, they're styles. But they're represented here as though they're layers.</p> <p>Including styles in this fashion only confuses potentially already very confusing layer lists. (for example - try figuring out what's a layer and what's a style in this getcap: http://ags-sdi-public.jrc.ec.europa.eu/arcgis/services/world-release4-ETRS89/MapServer/WMServer?version=1.3.0)</p>
