

QGIS Application - Feature request #21043

Expose all WFS information

2019-01-20 01:00 PM - Jonathan Moules

Status:	Open	Resolution: Copied to github as #: 28862
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WFS	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Exact same as #21042, but for WFS		
This WFS has taken the trouble to write a long Abstract: http://ogc.geo-ide.developpement-durable.gouv.fr/wxs?map=%2Fopt%2Fdata%2Fcarto%2Fgeoide-catalogue%2F1.4%2Forg_38102%2F2f3f11f0-91c9-479a-b748-ed1098603e91.internet.map&#38;version=1.3.0		
But there's no way to see it in QGIS. Similarly the long name and long title are also hidden, despite the fact I'm viewing this on a 1600pixel wide monitor.		
Similarly, as far as I can see, layer keywords are not displayed at all (although the ones on that layer are fairly meaningless), nor is any service level info (service name, title, abstract, keywords).		
Could not a dialog on the right side of the WFS panel be used to display the given information for the selected layer?
