Unable to add WCS - bad WCS Request

**Status:** Closed  
**Priority:** Normal  
**Assignee:**  
**Category:** Web Services clients/WCS  
**Affected QGIS version:** 3.4.3  
**Operating System:**  
**Pull Request or Patch supplied:** Yes  
**Crashes QGIS or corrupts data:** No  
**Copied to github as #:** 28864  
**Description**

This WCS:
http://thredds.ucar.edu/thredds/wcs/grib/NCEP/WW3/Regional_US_West_Coast/Best

It doesn't seem to be possible to add the layers. I get:

```
Raster layer Provider is not valid (provider: wcs, URI:
cache=PreferNetwork&crs&dpiMode=7&format=GeoTIFF_Float&identifier=Wind_speed_surface&time=2018-12-21T00:00:00Z&url=http://thredds.ucar.edu/thredds/wcs/grib/NCEP/WW3/Regional_US_West_Coast/Best
```

For some reason, QGIS is making the request with these CRS/RESPONSE_CRS parameters (obviously that's an invalid CRS):

```
CRS  EPSG:0 [Latitude_Longitude]
RESPONSE_CRS  EPSG:0 [Latitude_Longitude]
```

**History**
Duplicated by Bug report #21046: Unable to add WCS - bad error reporting added

Ok, if you think it's a duplicate, but they're both using the same error to report two different bugs in QGIS. One is that QGIS cannot connect to the WCS, the other is that QGIS doesn't handle WCS exception reports properly.

- Related to Bug report #21046: Unable to add WCS - bad error reporting added

Invalid request constructed because QGIS WCS provider handles only requestResponseCRSs element of the DescribeCoverage response. When this element is not found, it tries to get CRS from the RectifiedGrid element.

WCS server mentioned in the ticket reports invalid(?) CRS in that element

```
<gml:RectifiedGrid srsName="EPSG:0 [Latitude_Longitude]" dimension="2">
```

Here is an attempt to fix CRS handling https://github.com/qgis/QGIS/pull/9005

PR merged, I think we can close this now.
