

QGIS Application - Bug report #2105

missing/wrong symbology configuration after loading a saved project

2009-11-16 12:48 PM - Giovanni Manghi

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Symbology	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12165
Description	
<p>Add a point layer and style it with a symbol and a new size in map units. Save the project, close qgis and then reopen it.</p> <p>The layer show with wrong symbol size, and in fact in the symbology tab the checkbox "in map units" is not selected, so the symbols shows in pixels.</p> <p>Moreover the focus in the "Point Symbol" window is not on the right symbol.</p> <p>Tested on qgis trunk on both linux and windows.</p>

History

#1 - 2009-11-16 01:26 PM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

the map units part should be fixed in commit:6e3d7d69 (SVN r12152). The point symbol part is not reproducible here.
