Description

I have an issue committing data to a table in SQL Server 2012 where there is an "after update" trigger.

I get the error message " [Microsoft][ODBC SQL Server Driver][SQL Server]The target table 'dbo.vinterrydning_sti' of the DML statement cannot have any enabled triggers if the statement contains an OUTPUT clause without INTO clause. [Microsoft][ODBC SQL Server Driver][SQL Server]Statement(s) could not be prepared."

I can update the same data without any difficulties in QGIS 2.18.

Best regards
Lars Ellebjerg
