

QGIS Application - Bug report #21059

QGIS Server POST processing broken after modifications from commit:dedbbd4

2019-01-21 01:43 PM - Andreas Steffens

Status: Closed	
Priority: High	
Assignee: Alessandro Pasotti	
Category: QGIS Server	
Affected QGIS version: 3.4.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: Yes	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 28877

Description

The committed changes (commit:dedbbd4) seem to break the server in cases where a POST is used to transmit the query parameters. In this case QgsServerRequest analyzes the posted parameters and appends them to the original url so the server services can build QgsWmsParameters, QgsWfsParameters etc. from the query string. With the overridden url() getter in QgsFcgiServerRequest the original url is returned to the services which in a POST scenario has no query string resulting in the services (at least in their current implementation) to not be able to resolve the posted parameters.

History

#1 - 2019-01-21 01:47 PM - Jürgen Fischer

- Subject changed from QGIS Server POST processing broken after modifications from commit dedbbd4 to QGIS Server POST processing broken after modifications from commit:dedbbd4

- Description updated

#2 - 2019-01-21 01:58 PM - Alessandro Pasotti

- Assignee set to Alessandro Pasotti

#3 - 2019-01-21 03:43 PM - Alessandro Pasotti

- Status changed from Open to In Progress

- Priority changed from Normal to High

#4 - 2019-01-21 07:16 PM - Alessandro Pasotti

- Pull Request or Patch supplied changed from No to Yes
