QGIS Application - Bug report #21064
KML export fail QGIS crash

2019-01-22 12:23 AM - Mark Thomas

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Vectors			
Affected QGIS version:	3.4.4		**Regression?:**	No
Operating System:	Windows 10		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	no timely feedback
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	28882

Description

Loaded a fairly large GIS Geodatabase and attempted to export the whole and partal set as KML. QGIS consistently gets to 100% but then hangs leaving a large but invalid KML file as a result (1.5 GB approx in largest case) Try
