

QGIS Application - Bug report #21065

Missing chapter for Mesh in documentation

2019-01-22 07:51 AM - Saber Razmjooei

Status: Closed	
Priority: Normal	
Assignee:	
Category: Documentation and Help	
Affected QGIS version: 3.5(master)	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 28883
Description	
Similar to "Working with Vector Data" it will be good to have a chapter for intro to mesh. I am not sure if it is the best way forward? Happy to hear DelazJ's and other doc maintainers' comments.	

History

Here are the least of mesh related open tickets on the doc repo:

<https://github.com/qgis/QGIS-Documentation/issues?utf8=%E2%9C%93&q=is%3Aissue+is%3Aopen+mesh>

They can be all grouped under Working with Mesh Data

Hi Saber

Indeed, a "Working with Mesh Data" chapter needs to be [added to the doc](#) but I'm not sure this is the best place to discuss that. Given that there's a repository where doc issues are reported and where doc materials are provided, better hold this discussion there or in community ML. IMHO it has more chance to get adequate public and interest.

And it will be even better if someone can come with a draft to review: most of the issues you reference simply have title meaning that writers would need to browse the original PR for context and usage. Not optimal for people who may not know/play with this data type (my case, eg).

Side note: IMO the "Documentation and Help" category here should be kept for issues in API doc, missing or wrong descriptions for alg/function in the GUI...
