

QGIS Application - Bug report #2109

Quick Print plugin crashes qgis when used with symbolog-ng vectors

2009-11-17 03:07 PM - cgsbob -

Status: Closed	
Priority: Low	
Assignee: Martin Dobias	
Category: Python plugins	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 12169

Description

Steps to reproduce crash:

- 1) Load vector and change its symbology using the Labeling plugin.
- 2) Create PDF by using Quick Print plugin
- 3) Refresh screen (pan, zoom, or refresh)
- 4) Crash with the following message (same message as #2108):

Warning: Qt has caught an exception thrown from an event handler. Throwing exceptions from an event handler is not supported in Qt. You must reimplement QApplication::notify() and catch all exceptions there.

```
terminate called after throwing an instance of 'pal::PalException::LayerExists*'
Aborted
```
