

QGIS Application - Bug report #21125

Range widget gives NULL value in Attributes Form/Table

2019-01-29 09:42 PM - Nathan Perry

Status: Closed	
Priority: Normal	
Assignee:	
Category: Attribute table	
Affected QGIS version: 3.4.4	Regression?: No
Operating System: Mac OS 10.14.3	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 28943

Description

When updating a field value using the Range widget in the Attribute Form or Attribute Table, if "Allow NULL" is enabled, the entered value will not be accepted and the field will be changed to a NULL value. The up/down arrows in the widget are disabled and any value typed in will be ignored. The value can still be updated using the field calculator, by unchecking "Allow NULL" or by changing the widget to Text Edit.
