

QGIS Application - Bug report #21133

multiple crashes

2019-01-30 12:52 PM - Jim Edmunds

Status: Closed	
Priority: High	
Assignee:	
Category: Unknown	
Affected QGIS version: 3.4.3	Regression?: No
Operating System: Windows Professional 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: Yes	Copied to github as #: 28951

Description

Many times now since installing QGIS 3.4.2 i have had QGIS crash on me. So far as I can recall it has all been when working on a project set up by somebody else about a year ago, but re-saved by me recently. I've tried 3.4.2 and now the latest version 3.4.3 (downloaded today to try to fix the issue).

The crash happens variously when:

- + Closing QGIS (high probability of crash)
- + Opening a project with missing layers and going through the 'browse' function to re-assign the layers
- + Occasionally when working on the project with no obvious reason (not running plugins, etc.)

Crash ID: 5ad41d6be94809f981e2ec9b06a0e20f1d0b0a87
