Description		
<p>In QGIS 3.4.4.1 export to image produces the following error: "Unable to write to C:\folder\subfolder1\subfolder2\xxxx.png. This file may be open in another application". The file is not open in another application as it doesn't exist! I am running in Windows 10 as admin. Export to pdf and svg work fine. Export to image works fine in QGIS 2.18.</p>
