QGIS Application - Bug report #21140
Failed Connected in Geonode Instance

2019-01-31 10:07 AM - João Gaspar

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider/GeoNode			
Affected QGIS version:	3.4.4		**Regression?:**	No
Operating System:	Win10 an Win7 64-bits		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	28958

Description

Following this video
[[https://www.youtube.com/watch?v=I3j-9_AxpEo&t=166s]] and using the demo link: [[http://demo.geonode.org]] or using the new site
[[http://master.demo.geonode.org]] had a result a failed connection.

Tested in QGIS 3.2 and QGIS 3.4.4 and have the same behaviour.

Can anyone give feedback if it is a regression or the above link is incorrectly.

History

#1 - 2019-01-31 10:56 AM - Alexander Bruy

Probably related to #21093

#2 - 2019-01-31 11:11 AM - Giovanni Manghi

- Status changed from Open to Feedback

#3 - 2019-01-31 01:16 PM - João Gaspar

I confirm. This issue is related with #21093

When I try to add with master give me a warning in the log:

    2019-01-31T12:10:24   WARNING   Request failed: Error transferring http://dev.geonode.geo-solutions.it/api/layers//api/layers/ - server replied:

Not Found

2019-01-31T12:13:05   WARNING   Failed, empty layers

- Related to Bug report #21093: GeoNode API requests require a stronger minor version parsing added

#5 - 2019-02-01 09:25 AM - Giovanni Allegri

Yes Joao, it's the same issue as in #21093. Anyway from the log you're showing it seems that you're setting the <root>/api/layers URL for the connection, while only the <root> URL must be set.

#6 - 2019-02-01 11:19 AM - João Gaspar

Hi Giovanni, yes indeed this was a secondary test when I see #21093 (referenced by Alexander).

Thank you for all your feedback, I will wait for the evolution of this, after the fix I can back again and do the tests if you want.

Cheers,

João
