

## QGIS Application - Feature request #21206

### Consistent layer naming between Export > Save Features As to geopackage and other ways to add geopackage layers

2019-02-08 01:58 PM - Steve Lowman

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Legend	
<b>Pull Request or Patch supplied:</b>	No	
<b>Easy fix?:</b>	No	<b>Resolution:</b> <b>Copied to github as #:</b> 29024
<b>Description</b>		
<p>Case 1: When you Export &gt; Save Features As from an existing layer into a geopackage layer and check the Add to layers box, then the layer name is like &lt;geopackage_name &gt;&lt;layername&gt;.</p>		
<p>Case 2: When you use Browser or Data Source Manager to 'create a new layer or table', or to add an existing geopackage layer into the Layers, or use the New Geopackage Layer dialog, then the newly added layer name is just &lt;layername&gt;, and you do not get the geopackage name prefixing it.</p>		
<p>Please could the layer naming be consistent. Although I prefer the Case 1 outcome, I expect it may be a lot easier to make Case 1 behave the same as Case 2.</p>

Just to add for information, I have been working in QGIS 3.4.2 so far, and I think this request is really for a correction that should be implemented in the LTR. Thanks.
