

## QGIS Application - Bug report #21214

QGIS 3.4 asks "Do you want to save the current project?" **\*\*immediately\*\*** after program finishes the starting process.

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> GUI	
<b>Affected QGIS version:</b> 3.5(master)	<b>Regression?:</b> Yes
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> up/downstream
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 29032
<b>Description</b>	
Affected Platform: Windows 10 64-bit v1809 QGIS 3.4.4 64-bit  The v3.5 weekly is also affected.  Perhaps my very own configuration file is messed up? Any suggestions?	

### History

#### #1 - 2019-02-11 08:31 PM - Regis Haubourg

- Priority changed from Normal to High
- Affected QGIS version changed from 3.4.4 to 3.5(master)
- Regression? changed from No to Yes

Hi confirmed here on linux, with 3.4 or master as well. Opening an empty QGIS session asks to save the current projet. Really annoying.

Hi @sand thorn,

In the case of @Regis Haubourg, the issue was due to the **mask** plugin. Can you run QGIS with the **--noplugins** option?

or also try with a new profile.

- *Resolution set to up/downstream*

Ok, with a fresh profile I don't have the issue. Let's close that and raise upstream the issue.

**#6 - 2019-02-15 12:02 PM - Regis Haubourg**

A patch is coming upstream in the plugin : <https://github.com/aeag/mask/issues/72>

**#7 - 2019-02-15 03:25 PM - sand thorn**

For me, "Mask" plugin is in "Not Installed" category.  
I never enable this "Mask" plugin.

With "--noplugins" still reproduces this bug.

Semi-Automatic Classification Plugin generates same bug
