<b>Description</b>		
<p>1- In the Layout designer i can add shapes and nodes which is a very nice and handy feature, but when multi-selecting many items, styling will apply only on the 1st item of the selection, it would be perfect if it applies on all the selection or if we are styling a grouped items specially if they are the same type.</p> <p>2- if the feature above was implemented in the future it would be just perfect to be able to add "Select same (stroke, or fill or stroke and fill)" as the selected item that can include to the selection.</p>
