

QGIS Application - Feature request #21284

[Expression] Allow negative value for vertex index in angle_at_vertex/distance_at_vertex/point_n... functions

2019-02-15 02:15 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:	Mathieu Pellerin - nIRV	
Category:	Expressions	
Pull Request or Patch supplied:		Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 29102
Description		
<p>It could be nice that distance_to_vertex(\$geometry, -1) returns the length of the feature instead of -1 or point_n(\$geometry, -1) returns the last node. I know there are special functions for the examples I provide but it's more about generally allowing negative indices in these functions.</p> <p>It will align them with array manipulations as well as options offered in Processing dialogs (Extract specific vertices eg).</p>
