

QGIS Application - Bug report #21306

Incorrect raster behaviour and crashes

2019-02-18 06:47 PM - Tony Walters

Status: Closed	
Priority: High	
Assignee:	
Category: Map Canvas	
Affected QGIS version: 3.4.4	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: no timely feedback
Crashes QGIS or corrupts data: Yes	Copied to github as #: 29124

Description

I have many layers that are activated in different combinations. I have LiDAR DSMs and suddenly they now have the behaviour is that the canvas gets locked into continuously rendering the DSM over and over - only way to stop is to uncheck that LiDAR layer. Often, after this behaviour, when I try to close the project and load another, QGIS crashes with copt of dump below.

Crash ID: 71997e322a3e1d9f3a56c269670675e5530440ad
