

QGIS Application - Bug report #21323

Source Fields returns wrong description of attribute table

2019-02-20 12:56 PM - Tobias Wendorff

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Vectors	
<b>Affected QGIS version:</b>	3.5(master)	<b>Regression?:</b> No
<b>Operating System:</b>	Microsoft Windows 7, 64-bit	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29141
<b>Description</b>  1. Create a temporary scratch layer 2. Create a text field with unlimited length 3. Insert this text: string layer path This is a slightly longer text to check if the string processing by "Processing" works properly. Unfortunately, there are currently problems with the processing of numeric fields - hopefully not even with strings with more than 255 characters. Let's see what happens when we exceed magic limits imposed by the proprietary DBF format in the past. 4. Check_ Layer Properties > Source Fields_: The length of the field is fixed to 255, while the text is much longer.
