I can replicate this issue with QGIS 3.6.0. This was not an issue before QGIS 2.18, and with QGIS 2.14 it still works.

A sample is available on www.vewa-ev.de/Dokumente/Wijnands/Bilder/sample.zip and holds a JPG with an MapInfo TAB file holding its georeference. The JPG was not written with MapInfo, but probably for 10 years with XnView.

I need to use Win10 64 bit.

#5 - 2019-03-08 09:08 AM - Giovanni Manghi

- Operating System changed from Windows 10 to Windows
- Subject changed from Can't visualize jpg files to Can't visualize jpg files on Windows
- Status changed from Feedback to Open
- Affected QGIS version changed from 3.4.4 to 3.4.5

Patrice Wijnands wrote:

This is probably a problem with a library, not QGIS itself.
