

QGIS Application - Bug report #21396

JP2MrSID driver missing on GDAL drivers options after being disabled

2019-02-26 12:32 PM - Alexandre Neto

Status: Open	
Priority: Normal	
Assignee:	
Category: Data Provider	
Affected QGIS version: 3.6.0	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 29213
Description	
<p>If you deactivate the JP2MrSID driver in the GDAL Drivers list, after you reload QGIS, the driver will not longer be listed. From that point on, it becomes impossible to enable it back.</p> <p>The workaround is to start a new profile, or edit the QGIS3.ini file and remove the driver from the skipList.</p> <pre>[gdal] skipList=JP2MrSID JP2ECW GTiff</pre> <p>Note that other drivers in the above example appear in the GUI to be activated</p>
