

QGIS Application - Feature request #21400
Install with check for operating system (e.g. win64 vs. win32)

Status:	Open	
Priority:	Low	
Assignee:	Jürgen Fischer	
Category:	Windows Package	
Pull Request or Patch supplied:	No	Resolution:
Easy fix?:	No	Copied to github as #: 29217
Description		
<p>I was incidentally trying to install a QGIS Standalone Installer Version 3.6 (64 bit) on a 32 bit Win OS, which seemed to work, but gave a restart of the system at the end and left the start menu only with Grass Shortcuts. Starting C:\Program Files\QGIS 3.6\bin\qgis-bin-g7.exe manually finally gave the message that explained everything: wrong OS. It would be perfect if that bit of code could be copied to the install routine, thus preventing user misbehaviour ;-)</p> <p>Thank you in advance, it's great to watch QGIS growing and getting better all the time!</p>
